

TECHNICAL DATA

BOTTLE GLIDE SH

High Dilution Track Lubricant

DESCRIPTION

Bottle Glide SH is a moderately foaming, concentrated, water based track lubricant. It provides excellent lubricity and detergency on most conveyor tracks and chain, even in hard water conditions. In addition to removing existing soil deposits, **Bottle Glide SH** actually helps keep conveyors free of soil.

This product is safe to use on most metal materials found in food processing operations.

DIRECTIONS

Use concentration of this product will be dependent on the water hardness, type of conveyor material used, type of operation, containers in use, line speeds, desired degree of lubricity, as well as the detergency required.

Initial Guide for Concentration Setting:

Water Hardness

100
200
300

Bottle Glide SH Dilution

1:250
1:100
1:65

CONTAINS

Fatty acids, EDTA, and Anionic Surfactants.

FOR FOOD PLANT AND INDUSTRIAL USE ONLY
